#### IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

pplicants:

Ranta et al.

Docket No: 36373-015 (new); B-26 (old)

Serial Number:

09/970,071

Examiner:

Saadat, Cameron

Filing Date:

October 3, 2001

Art Unit:

3714

For:

Methods and apparatus for simulating dental procedures ...

#### Declaration of Inventors under 37 C.F.R. §1.131

- We, John Ranta of Princeton, MA, Walter A. Aviles of San Diego, CA, R. Bruce Donoff 1. of Chestnut Hill, MA, and Linda P. Nelson of West Newton, MA, are co-inventors of the above patent application. Claims in this application are directed to methods and apparatuses for simulating dental procedures for training dental students.
- 2. The subject matter of the claims was completed by all of us, as shown by the Oath/Declaration submitted with the application as filed that was executed by all of us. See Exhibit A attached hereto, which is a copy of the executed Oath/Declaration. The conception and reduction to practice of the invention as described and claimed in the above application was completed prior to July 19, 2000.
- As evidence, we attach hereto a Report of Invention that was submitted to Harvard 3. University showing that we developed a realistic virtual reality dental simulator with a haptic interface, prior to July 19, 2000. See Exhibit B attached hereto, p. 1. The haptic interface provided sensorimotor feedback simulating structural reality of enamel, dentin, and pulp. Ibid. p. 1. A simulated drill permitted removal of simulated decay and cavity repair. Ibid. p. 1. The prototype simulator could simulate different dental tools virtually. Ibid. p. 3.
- The prototype simulator involved development of: using haptic enhanced computer graphics to teach and learn dental techniques; dental trainer providing sensorimotor feedback; reusable virtual tooth for simulator; reusable normal and decayed visual and sensory renderings of enamel, dentin, and pulp; instrumentals including virtual amalgam packer and plugger, drill, and explorer; end and side cutting virtual burrs; courseware in form of acceptable basic cavity designs; and intellectual content for amalgam properties to simulate realistic practice. Ibid. pp. 2-3.
- The prototype described in paragraphs 3 and 4 was invented in the United States through experiments performed by us or by technicians working under our direction, and was invented prior to July 19, 2000.

Description of Invention (please type or print clearly):

1. Brief Summary (add any extra pages or drawings, if needed, as well as any relevant manuscripts or articles if available)

Working with Teneo Computing, Inc., HSDM has developed a realistic virtual reality dental simulator. A haptic interface adds sensorimotor feedback simulating structural reality of enamel, dentin and pulp. A simulated drill permits removal of decay and cavity repair. This prototype simulator required development of:

- 1. Concept of using haptic enhanced computer graphics to teach and learn dental techniques;
- 2. Dental trainer providing sensorimotor feedback;
- 3. Reusable virtual tooth for simulator;
- 4. Reusable normal and decayed visual and sensory renderings of enamel, dentin and pulp;
- 5. Înstrumentals including virtual amalgam packer and plugger, drill, and explorer;
- 6. End and side cutting virtual burrs;
- Courseware in form of acceptable basic cavity designs;

617 439 3987

P.003/005 PAGE 03/05

- Intellectual content for amalgam properties to simulate realistic practice; 8.
- Plans to continue validation and continuing feedback on technological 9. implementation of practice;
- Courseware in properties and manipulation of restorative materials. 10.
- 2. Background including specific literature citations if available
- 3. Expected future uses and/or commercial applications (please list as many applications as you feel are feasible):
  - Use of virtual trainer to replace manikin teaching; 1.
  - Extension and validation of prototypical examples into a commercial Virtual Reality 2. Dental Training System (VRDTS);
  - Use in dental schools for basic teaching; 3.

Signature)

- Use in continuing education e.g. implant training; 4.
- Use in distance web learning. 5.

Subject:

Patent application for: Methods and apparatus for simulating dental procedures (HU#1755);

our ref.: 36373-015

Dear John, Bruce, Linda, and Aviles

Sonia and I would like to take a moment to introduce ourselves. We are patent attorneys in Boston, MA and will be continuing the prosecution of the above patent application.

The above application has been rejected in view of a paper presented at the International Conference on Information Visualization in 2000. We believe that this rejection can be overcome by a procedure known as "swearing behind". Accordingly, we have prepared a Declaration for all of you to sign, to swear to inventing the subject matter of the current application prior to the publication the 2000 paper.

Dr. Gordon has asked us to send this Declaration to you for your signature. Please print, sign, and return to us the attached Declaration. We need to have your signed copies by <u>April 18, 2007</u>, so we can submit them with our Response, which is due April 20, 2007. The signed document can be returned to us by facsimile using the facsimile number below or as a PDF file and emailed back to us at the email address below.

#### Best regards

Sonia and Adam

Patent application for: Methods and apparatus for simulating dental procedures (HU#1755);

our ref.: 36373-015

#### Dear Dr. Aviles

Sonia and I would like to take a moment to introduce ourselves. We are patent attorneys in Boston, MA who do a large amount of work for Harvard University and Harvard Medical School, and will be continuing the prosecution of the above patent application.

The above application has been rejected in view of a paper presented at the International Conference on Information Visualization in 2000. We believe that this rejection can be overcome by a procedure known as "swearing behind". Accordingly, we have prepared a Declaration for the four co-inventors to sign, to swear to inventing the subject matter of the current application prior to the publication the 2000 paper.

Dr. Gordon has asked us to send this Declaration to you for your signature. Please print, sign, and return to us the attached Declaration. The three other co-inventors have already signed and returned their copy of the Declaration to us. We need to have your signed copy by May 10, 2007, so we can submit the four Declarations with our Response, which is due May 20, 2007. The signed document can be returned to us by facsimile using the facsimile number below or as a PDF file and emailed back to us at the email address below.

Please confirm receipt of this email.

Best regards

Sonia and Adam

Hi

Bruce sent him an email yesterday afternoon. If he doesn't respond in a day or so I'll ask him to make a phonecall. If you get the signed declaration, please let me know so I can stop bugging Bruce.

Meanwhile is there a contingency plan for 3/4 inventors?

Dear Dr. Maslow,

This email verifies my identity as a patent attorney, in hopes of getting contact info for Dr. Walter Aviles.

Thank you in advance for help.

Patent application for: Methods and apparatus for simulating dental procedures (HU#1755);

our ref.: 36373-015

Dear Dr. Aviles

All previous attempts to contact you by phone or email have failed, so we have no idea whether these are systems failures or you are not interested in responding. We have attempted to obtain a telephone number for you from Novint but to no avail.

Dr. Gordon of Harvard University has asked us to send this Declaration to you for your signature. All of the other inventors have signed, and the absence of a signed copy from you makes us have to initiate a much more expensive procedure. There is no possible harm that can come to you from signing, however the cost of the more expensive procedure will be subtracted from any revenues that this may possibly generate for you and other inventors.

We see no reason why you are not interested in helping out the progress of this Harvard Med invention, as regardless of what the future holds for you, there is no reason that you should cast aside Harvard as a friend. Further, as you remain involved in high tech, you should want any patent application of which you are an inventor to issue as a patent, as efficiently and economically as possible.

Please print, sign, and return to us the attached Declaration. We need to have your signed copy by May 15, 2007, so we can submit the four Declarations with our Response, which is due May 20, 2007. The signed document can be returned to us by facsimile using the facsimile number below or as a PDF file and emailed back to us at the email address below.

Please confirm receipt of this email.

Appendix I

#### IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicants:

Ranta et al.

Docket No: 36373-015 (new); B-26 (old)

Serial Number:

09/970,071

Examiner:

Saadat, Cameron

Filing Date:

October 3, 2001

Art Unit:

3714

For:

Methods and apparatus for simulating dental procedures ...

#### Declaration of Assignee under 37 C.F.R. §1.131

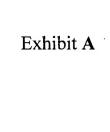

- The subject matter of the claims was completed by the four inventors and assigned to President and Fellows of Harvard College. See Exhibit A attached hereto, which is a printout from the U.S. Patent and Trademark Office Assignment Database showing assignment of the rights in the invention corresponding to the above serial number to President and Fellows of Harvard College.
- Harvard University has a computer records database in which Reports of Invention are kept in the course of regularly conducted business activities. It is the regular practice of Harvard University to request that such Reports be made by inventors and to enter and docket such Reports into the computer database as of the date received from the inventors. Attach hereto is a Report of Invention that was submitted by the inventors of the above application to Harvard University and entered into the computer database. See Exhibit B attached hereto. The computer database shows that the Report of Invention was made of record in the database prior to July 19, 2000.
- The report shows that the inventors developed a realistic virtual reality dental simulator with a haptic interface, which Report was entered into the computer database prior to July 19, 2000. See Exhibit B attached hereto, p. 1. The haptic interface provided sensorimotor feedback simulating structural reality of enamel, dentin, and pulp. Ibid. p. 1. A simulated drill permitted removal of simulated decay and cavity repair. Ibid. p. 1. The prototype simulator could simulate different dental tools virtually. Ibid. p. 3.
- The prototype simulator involved development of: using haptic enhanced computer graphics to teach and learn dental techniques; dental trainer providing sensorimotor feedback; reusable virtual tooth for simulator; reusable normal and decayed visual and sensory renderings of enamel, dentin, and pulp; instrumentals including virtual amalgam packer and plugger, drill, and explorer; end and side cutting virtual burrs; courseware in form of acceptable basic cavity designs; and intellectual content for amalgam properties to simulate realistic practice. Ibid. pp.

I hereby declare that all statements made herein of our own knowledge are true and that 5. all statements made on information and belief are believed to be true; and further that these statements are made with knowledge that willful false statements and the like so made are punishable by fine or imprisonments, or both, under Section 1001 of Title XVIII of the United States Code and that willful false statements may jeopardize the validly of this application for patent or any patent issuing thereon.
